The General Assembly hereby finds and declares that it shall be the policy of this State to support and promote sound science in agriculture. For purposes of this section, "sound science in agriculture" means the use of science-based agricultural practices, technologies, or biological systems supported by research or otherwise demonstrated to lead to broad outcomes-based improvements, including such critical outcomes as increasing agricultural productivity and improving human health through access to safe, nutritious, affordable food and other agricultural products, including organically produced foods and products, while enhancing agricultural and surrounding environmental conditions through the stewardship of water, soil, air quality, biodiversity, and wildlife habitat. Further, the General Assembly finds and declares that it is in the interest of the people of this State to use sound science in agriculture to meet the needs of the present and to improve the ability of future generations to meet their own needs, while advancing progress toward environmental and economic goals and the well-being of agricultural producers and rural communities.-(2015-263, s. 3.)

Provenance

This document reproduces the text of one section of the General Statutes of North Carolina from a source file whose SHA-256 digest is printed on every page. The digest fixes the bytes this export was made from; if the State's file changes, the digest will not match.

The text of the section is unaltered. Subsection designators have been moved from the run of text into the margin. The amendment history and the table of authorities are derived from the section by mechanical extraction — they add no characterization of the law.

This is not the official text. The official text is published by the General Assembly of North Carolina.
