The General Assembly finds that high purity quartz is a highly valuable resource used in the manufacture of semiconductors, optical fibers, circuit boards, and other technologically advanced components and it is therefore in the public interest for the State to guard its deposits of high purity quartz from the potential of adversarial foreign government control in order to protect our vital mineral and economic resources. Provenance

This document reproduces the text of one section of the General Statutes of North Carolina from a source file whose SHA-256 digest is printed on every page. The digest fixes the bytes this export was made from; if the State's file changes, the digest will not match.

The text of the section is unaltered. Subsection designators have been moved from the run of text into the margin. The amendment history and the table of authorities are derived from the section by mechanical extraction — they add no characterization of the law.

This is not the official text. The official text is published by the General Assembly of North Carolina.
