

CHAPTER 90

ARTICLE 5E - NORTH CAROLINA CONTROLLED SUBSTANCES REPORTING SYSTEM ACT

N.C.G.S. § 90-113.71.

Legislative findings and purpose.

SOURCE	LAST AMENDMENT IN THIS TEXT	RETRIEVED	SOURCE FINGERPRINT
General Statutes of North Carolina, as published by the General Assembly	No amendment history on record	21 September 2026, 03:36 UTC	07a342e861e786a4143dc461 - dabc169f53996ab2803e9f27 - 14d873c12f6c8929

§ 90-113.71(a)

The General Assembly makes the following findings:

- (1) North Carolina is experiencing an epidemic of poisoning deaths from unintentional drug overdoses.
- (2) Since 1997, the number of deaths from unintentional drug overdoses has increased threefold, from 228 deaths in 1997 to 690 deaths in 2003.
- (3) The number of unintentional deaths from illicit drugs in North Carolina has decreased since 1992 while unintentional deaths from licit drugs, primarily prescriptions, have increased.
- (4) Licit drugs are now responsible for over half of the fatal unintentional poisonings in North Carolina.
- (5) Over half of the prescription drugs associated with unintentional deaths are narcotics (opioids).
- (6) Of these licit drugs, deaths from methadone, usually prescribed as an analgesic for severe pain, have increased sevenfold since 1997.
- (7) Methadone from opioid treatment program clinics is a negligible source of the methadone that has contributed to the dramatic increase in unintentional methadone-related deaths in North Carolina.
- (8) Review of the experience of the 19 states that have active controlled substances reporting systems clearly documents that implementation of these reporting systems do not create a "chilling" effect on prescribing.
- (9) Review of data from controlled substances reporting systems help:

- a.Support the legitimate medical use of controlled substances.
- b.Identify and prevent diversion of prescribed controlled substances.
- c.Reduce morbidity and mortality from unintentional drug overdoses.
- d.Reduce the costs associated with the misuse and abuse of controlled substances.
- e.Assist clinicians in identifying and referring for treatment patients misusing controlled substances.
- f.Reduce the cost for law enforcement of investigating cases of diversion and misuse.
- g.Inform the public, including health care professionals, of the use and abuse trends related to prescription drugs.

§ 90-113.71(b)

This Article is intended to improve the State's ability to identify controlled substance abusers or misusers and refer them for treatment, and to identify and stop diversion of prescription drugs in an efficient and cost-effective manner that will not impede the appropriate medical utilization of licit controlled substances. (2005-276, s. 10.36(a).)

N.C. Gen. Stat. § 90-113.71 (2026).

PINPOINT

N.C. Gen. Stat. § 90-113.71(a) (2026).

Pinpoint keys are set in the left margin of the text rather than line numbers: subsection designators are stable across editions and paper sizes, line numbers are not.

COLOPHON

Provenance

This document reproduces the text of one section of the General Statutes of North Carolina from a source file whose SHA-256 digest is printed on every page. The digest fixes the bytes this export was made from; if the State's file changes, the digest will not match.

The text of the section is unaltered. Subsection designators have been moved from the run of text into the margin. The amendment history and the table of authorities are derived from the section by mechanical extraction — they add no characterization of the law.

This is not the official text. The official text is published by the General Assembly of North Carolina.
